

Company Profile

Custom Solutions for Data Centres
and Critical Infrastructure

Our Purpose

We provide top-tier solutions for strategic procurement and maintenance of digital infrastructure tailored for Data Centers and Telecommunication companies . Our comprehensive support extends across the entire lifecycle of digital assets, guaranteeing resilience and maximising utilisation

Service Offerings

Data Centre Infrastructure Procurement Solutions

We partner with reputable global firms that produce solutions for your Data Centre infrastructure – these include Amazon, Vertiv and HW Group. We support Data Centre clients across Africa with strategic procurement, distribution and after-sales services for Critical Power, Thermal Management, Racks & Enclosures, Monitoring and Management and a host of Project and Digital Services

Specialist Maintenance Services

Digi-clean offers a wide range of maintenance services as well as specialist services such as data hall maintenance and rack cleaning. We offer customised services based on the client's needs.

Soft Facilities Management Services

We support Data centres and Critical Infrastructure clients with soft facilities management services that allow them to focus on the more value adding activities

Data Centre Managed Services

Digiclean offers clients managed service relationships that involve the day-to-day management responsibility for data centres or host platforms.

Data Centre Training

- Data Centre Management Training
- Cloud Migration Training
- Cybersecurity Training
